RECEIVED  
MAY 03 1991

U.S. EPA, REGION V  
WASTE MANAGEMENT DIVISION  
OFFICE OF THE DIRECTOR

Dear Sir:

A Technical Review Committee (TRC) will be formed for oversight of the creation and implementation of the Navy's Installation Restoration Program (IRP) at Naval Air Station Glenview. The IRP is designed to conform to the scope and purpose of the National Oil and Hazardous Substances Contingency Plan (NCP). This program involves the investigation and, if necessary, remediation of past hazardous waste disposal sites. The TRC will consist of federal and state environmental protection officials, station personnel, and community personnel. The meetings of the TRC will be scheduled on a quarterly basis, during normal working hours, and will be held at the Naval Air Station.

We request that a representative of EPA Region V be appointed to serve on the Technical Review Committee. It is suggested that the person selected have experience in dealing with environmental concerns. The initial meeting of the TRC is tentatively scheduled for late June or early July 1991. Please respond with the name, mailing address, and telephone number of your representative by Friday, 17 May 91.

Responses and requests for further information regarding the Installation Restoration Program should be directed to LCDR Mark Kimball, Code 70, Bldg. 16, Naval Air Station Glenview, IL 60026-5000, commercial 708-657-2124.

  
W. D. VANDIVORT  
Captain  
U.S. Navy Reserve  
Commanding Officer
